
 ID  IN PROGRESS

Nginx custom image needs an update

This changes could be the following:

- Security Updates
- nginx.conf or vhost config needs update
- special changes in the container

Do not mix the workflows!

1. Workflow only for service (nginx, mysql) configs changes

2. Workflow is only for changes in the /app folder

 web-5555  IN PROGRESS

Developer changes something in app folder

This changes are only changes in the application itself

If you need changes in nginx oder php or mysql, please follow the Operations workflow
